2020-03-29, 13:32

Below please find a list of selected suggestions of workshops for the IGF Poland 2019 conference. We are awed by the volume and quality of this year's submissions, which can be an indication of the fact that IGF Poland conferences have become one of the key events concerning issues of Internet management and the digital economy in Poland.

We thank everyone for your submissions and congratulate those who were selected - while keeping our fingers crossed for next year for those who weren't!

The [agenda](#) of IGF Poland 2019.

Digital Centre Foundation (The Jagiellonian Club)	Automatic Decision Making in Polish Business and Administration
The City is Ours Association/ Code for Poland	Open data and civic tech in the service of local governments and citizens - On-line participation tools
